Operating System Navigation Checklist

Student Name: Justin Ramos

Date: 10/28/26

Instructions

Navigate to each Windows feature listed below and take a screenshot showing the feature open.

Save all screenshots and upload them to your Week 3 GitHub folder.

Required Tasks

☐ Open Windows Settings

☐ Open File Explorer

☐ Open System Information

☐ Open Device Manager

☐ Open Task Manager

Screenshot Verification

Screenshot 1: Windows Settings

☑ Completed

File Name: Windows-Settings.png

Screenshot 2: File Explorer

☑ Completed

File Name: File-Explorer.png

Screenshot 3: System Information

☑ Completed

File Name: System-Information.png

Screenshot 4: Device Manager

☑ Completed

File Name: Device-Manager.png

Screenshot 5: Task Manager

☑ Completed

File Name: Task-Manager.png

Reflection

Briefly describe what areas of Windows you accessed during this activity.

I visited the most important areas of Windows as these apps are where all the information about your computer is. Apps like task manager are where you can see what's causing issues on your computer. Device manager is where you see all devices connected to your computer. Settings is where everything about the system is located. System information shows more details about the info on your computer. File explorer is where all your files are saved, this is where most of your data is stored.
